# THE GEOGRAPHY OF MORTGAGE DENIAL

State−level denial rates | 2,034,914 eligible applications | 2025 HMDA

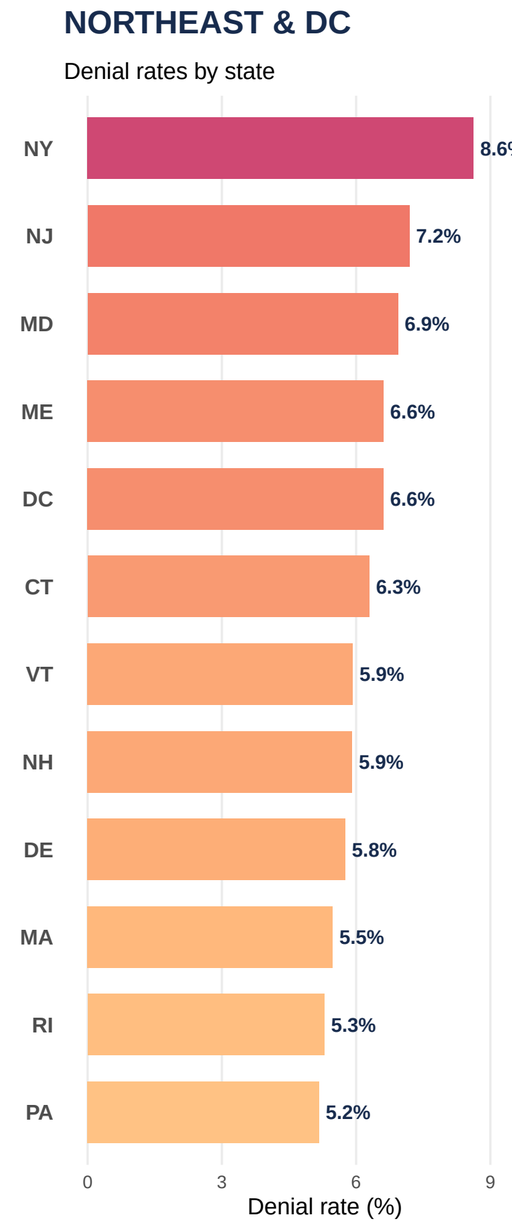

Figure 5. Geographic variation in mortgage denial rates across the United States using 2,034,914 eligible applications from the 2025 HMDA study cohort. State−level rates are unadjusted, with an aggregate denial rate of 7.08% across the 50 states and Washington, DC, compared with 7.30% in the full eligible sample. Geographic differences should not be interpreted as evidence of causal discrimination.
